SECURITY & SAFETY

LogBook360 puts control at your fingertips. Define policies, gate access based on identity and intent, and capture evidence-ready logs without slowing down your front desk. It's more than a check-in system—it's a proactive layer of defense, helping you prevent incidents and respond decisively when the unexpected happens.

Glimpse of key features offered by LogBook360

STREAMLINED VISITOR PROCESS

APPOINTMENTS

Customers, vendors, interviewees, and guests can book appointments directly with the right contact. Decision makers manage calendars using native integrations with Google Workspace, Microsoft Outlook, and iOS/Android calendars. Automated confirmations and reminders reduce no-shows and keep schedules on track.

SELF-REGISTRATION

Reduce the load on your reception team by letting visitors pre-register from home or office. LogBook360 captures essential details, validates known identifiers, and issues a pre-visit QR code. Hosts and visitors receive real-time notifications, eliminating manual follow-ups and paper logbooks.

CONTACTLESS MANAGEMENT OF WALK-IN VISITORS

Using the LogBook360 Kiosk (web-based or device-native), visitors can register their arrival, provide required details, and notify the person they're meeting—without manual intervention.

Prefer total touchless?

Visitors scan a location-specific QR code and complete the process on their own device, keeping queues short and hygiene high.

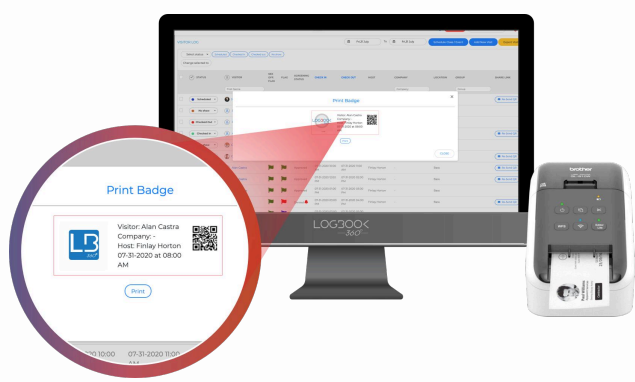

CHECK-IN AND CHECK-OUT WITH A QR CODE

Speed up on-site flow by enabling QR-based check-in/check-out. Unique visit QR codes are auto-generated and sent via email/SMS. Arrival and departure times are recorded precisely and securely, no shared pens, no clipboards, no manual logbook, no ambiguity.

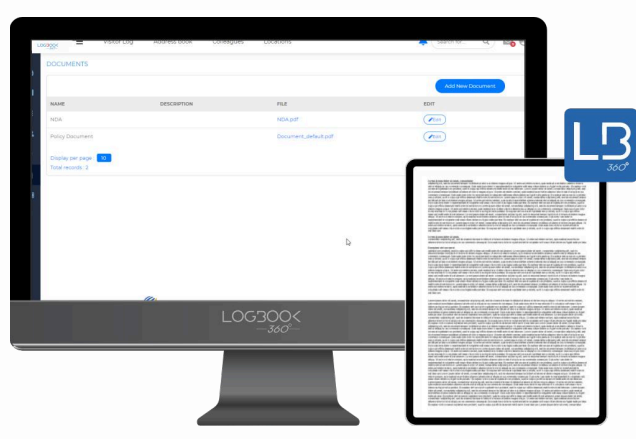

BADGE PRINTING

Issue custom badges automatically on check-in. Add dates, visit times, photos, host names, and color-coding per visitor type (contractor, interviewee, vendor, guardian, etc.). Badges increase visibility, compliance, and confidence across your facility.

SETUP YOUR CHECK IN POLICY

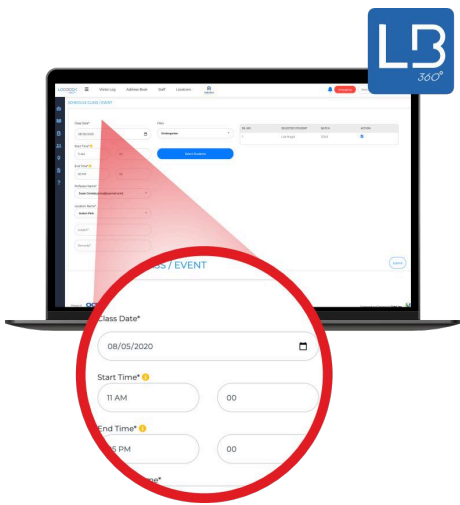

Ensure every visitor acknowledges the rules that keep your campus safe. Upload policy documents — NDAs, terms & conditions, safety guidelines, and emergency instructions—and collect digital signatures as part of check-in. Policies and signatures are stored securely for audit and compliance, reducing paperwork and carbon footprint.

Features

SCHEDULE AN EVENT

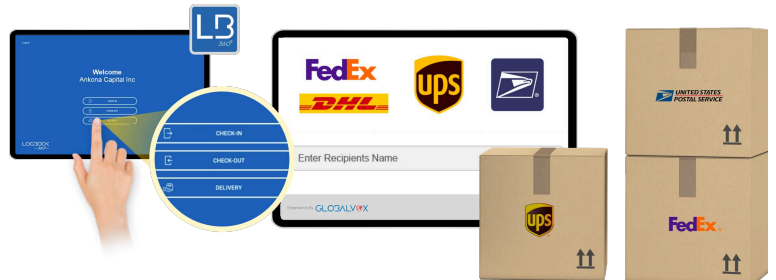

Create events with a few clicks. Add visitors or vendors, share location details, host contact information, and access instructions. LogBook360 sends a branded invite with a QR code for streamlined arrival and departure tracking.

- Interviewee - Interviewer meeting
- Vendor - HR/Admin meeting
- Customer visits
- Other visitor arrival and departure

DELIVERY NOTIFICATIONS

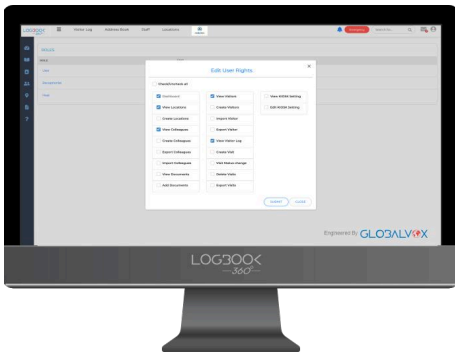

Make deliveries effortless with automated workflows. The system issues alerts to the right recipients upon package arrival and records chain-of-custody details. Track pickups, proof of delivery, and SLA adherence, all from one dashboard.

CONTEXTUAL HELP / SELF HELP GUIDE

Accelerate adoption with an intuitive self-help guide. Contextual tips appear where users need them—kiosk screens, admin pages, and reports. Transition from traditional processes to a next-generation, user-centric solution with minimal training time.

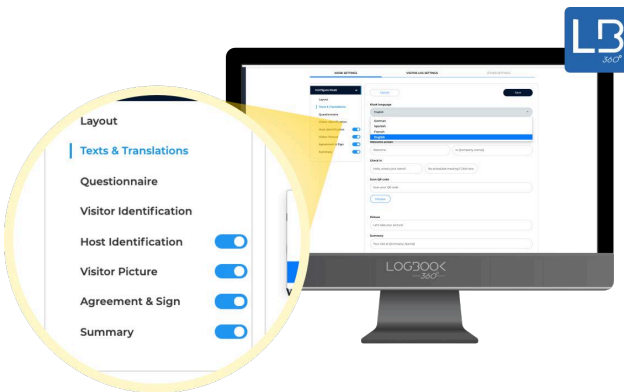

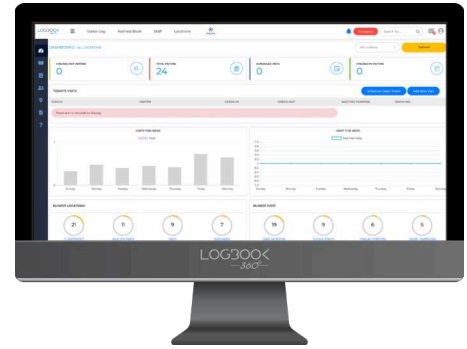

ROLE AND PERMISSION BASED ACCESS

Assign precise privileges to reception, security, HR, facilities, and executive teams. Role-based access ensures that each user sees exactly what they need, enabling a clear separation of duties and reducing risk.

DASHBOARD AND REPORTING CONFIGURABILITY

A graphical dashboard shows real-time check-ins and check-outs, active appointments, busiest hosts, and location-level trends. Standard and custom reports give you audit-ready data for compliance, occupancy planning, and emergency readiness. Export to PDF/XLS for sharing and long-term record-keeping.

MULTI-LANGUAGE SUPPORT

Welcome global visitors with language selection on kiosk and mobile flows. Reduce friction and errors by letting guests register in their preferred language.

CONFIGURABILITY

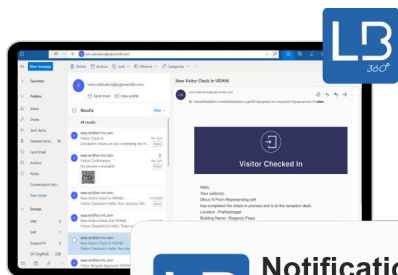

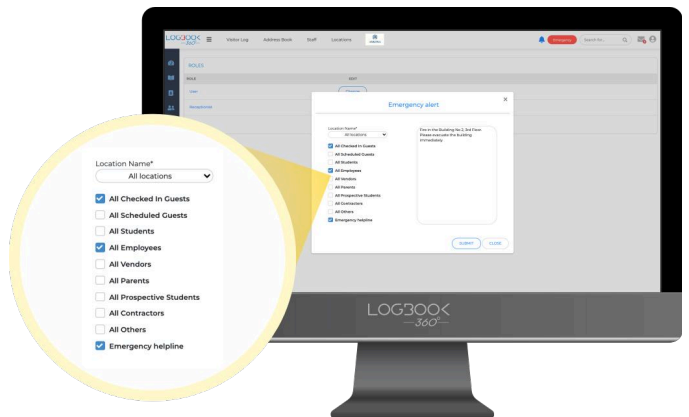

Brand the LogBook360 Kiosk with your logo, wallpaper, and corporate colors. Configure visitor types, badge styles, mandatory fields, early/late check-in rules, and on-screen instructions—down to the site level—so each location can reflect its unique operational needs.

Emergency Management

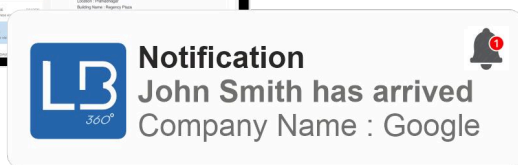

EMERGENCY ALERTS

Trigger instant SMS or email alerts to your emergency contact groups. Notify floor wardens, security, and leadership with time-stamped context (who, where, what), accelerating response and coordination.

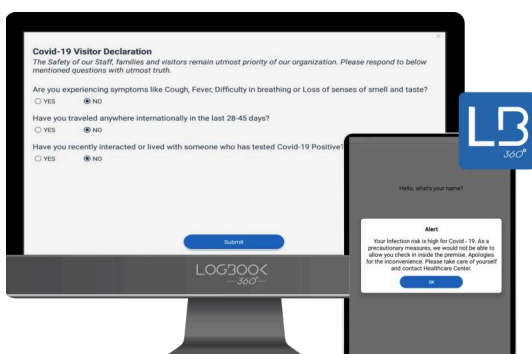

NOTIFICATIONS

Broadcast messages about operational updates, policy changes, town halls, drills, and events. Segment audiences by building, floor, role, or visit type—deliver the right information to the right people, fast.

EVACUATION AND REUNIFICATION

Evacuations can be stressful for administrators, managers, visitors, vendors, and employees. LogBook360 provides live rosters, location-aware checklists, and reunification support to help account for individuals and close incidents with confidence—all while maintaining compliance records.

INCIDENT MANAGEMENT

Record and manage safety, security, or operational incidents in a centralized system. Capture incident / accident details and evidence (if required), Notify related authorities or concern persons and maintain audit-ready records.

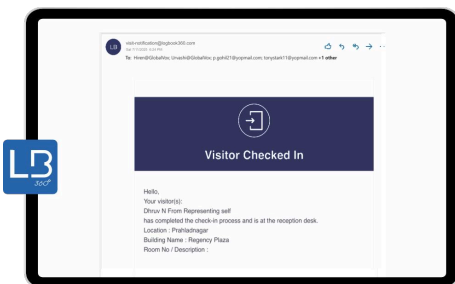

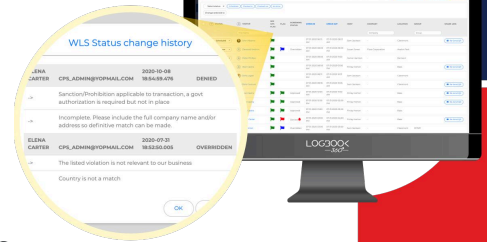

Integrations

WATCHLIST SCREENING

Know Your Visitor

Perform real-time screening of visitor names and/or companies they represent against approved watchlists and custodianship databases. When a potential match is detected, LogBook360 automatically flags the visit, alerts administrators, and enforces review-first workflows before granting access.

EMAIL AND SMS NOTIFICATIONS

Send automated, fully customizable notifications for visit lifecycle events—pre-visit reminders, arrival alerts, host notifications, overstay warnings, and departure confirmations — ensuring everyone stays informed without manual follow-up.

EMPLOYEE MANAGEMENT /ERP INTEGRATION

Time & Attendance

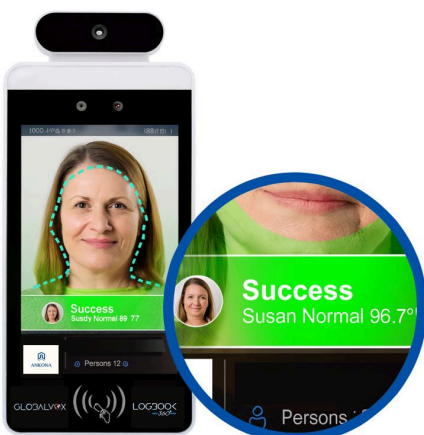

LogBook360 delivers real-time ERP and HRIS integration, syncing personnel data, rosters, and policies while streamlining visitor workflows. Its AI-powered Time & Attendance connects with ADP, Oracle PeopleSoft, Oracle HCM Cloud, Workday, and more to ensure unified workforce management and compliance.

ACCESS CONTROL WITH FACIAL RECOGNITION AND MANAGE COVID-19 PROTOCOLS

Perform Temperature Checks

Integrate with physical access control systems to grant/deny entry at doors and gates. Configure supported devices for mask compliance and temperature checks where policy requires. Keep open areas secure while streamlining authorized access.

ALBi ASSISTANT FOR VISITOR MANAGEMENT

Voice Guided, Multi Lingual Support and Intelligent Navigation

Large corporate campuses and enterprise facilities can be difficult to navigate for clients, partners, contractors, interview candidates, and vendors. LogBook360's Agentic AI Assistant streamlines the entire visit lifecycle through natural conversational interaction available on kiosks, mobile devices, or a visitor's own phone. This reduces front desk load and enhances the overall visitor experience.

Voice Driven Multi Lingual Visit Management

Visitors can speak in their preferred language to schedule appointments, confirm details, complete check in, reschedule, or check out. Employees and reception teams can also manage visits quickly using simple voice prompts.

Smart Host Assistance

Employees receive automated reminders, arrival alerts, delay notifications, and daily visit summaries. This improves preparedness and ensures smoother coordination between hosts and reception teams.

Instant Answers to Campus Questions

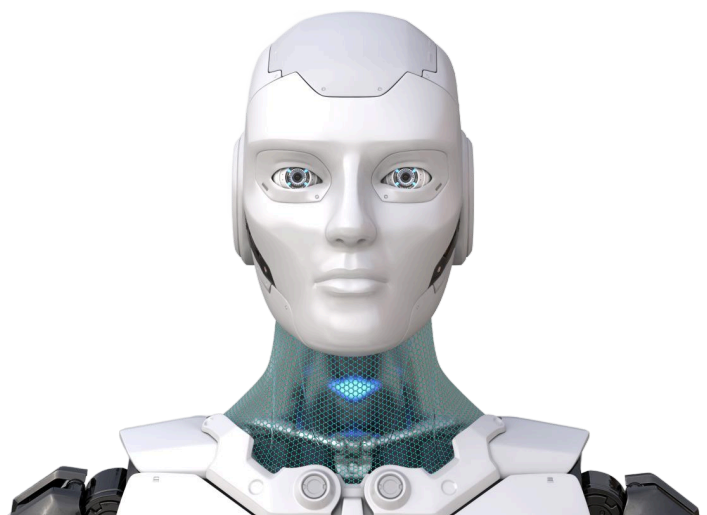

The assistant provides quick responses about meeting room locations, check in requirements, safety protocols, facility hours, event details, and host information. This reduces repetitive inquiries and ensures consistent communication across your organization.

Intelligent Facility Navigation

Once a visit is confirmed, the AI Assistant provides real time turn by turn guidance across the workplace. Visitors can navigate from parking areas to reception, meeting rooms, executive offices, manufacturing floors, or secure zones through live location mapping on their phone.

Inclusive and Accessible Experience

Voice and multi language support help international visitors, people with visual impairments, and guests who prefer hands free or translated guidance, creating a more accessible and professional experience.

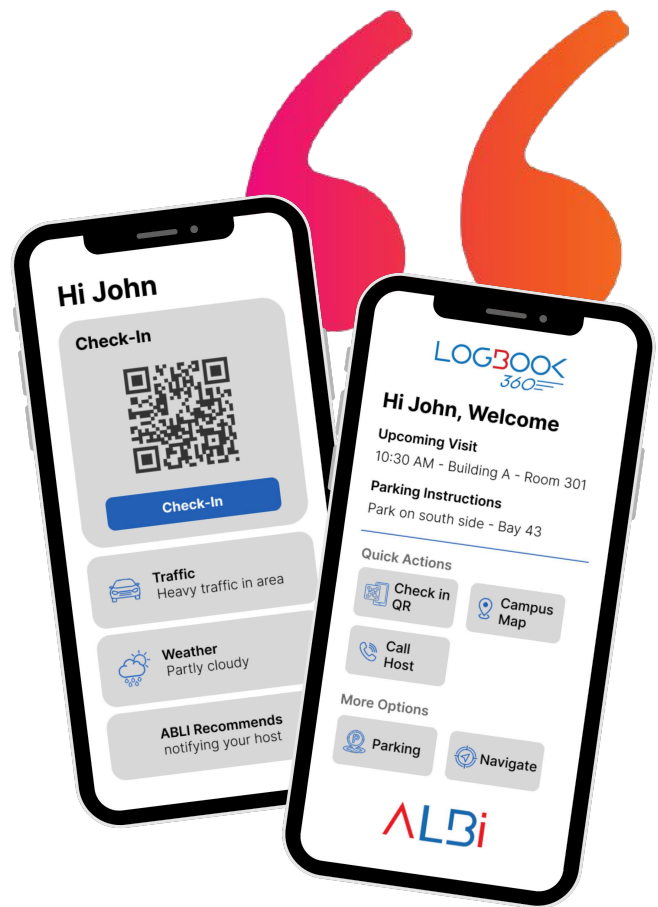

AL3i is LogBook360's intelligent voice and multi lingual AI assistant that guides hosts and visitors through the complete visit lifecycle. From scheduling and check in to navigation and real time support, AL3i modernizes and

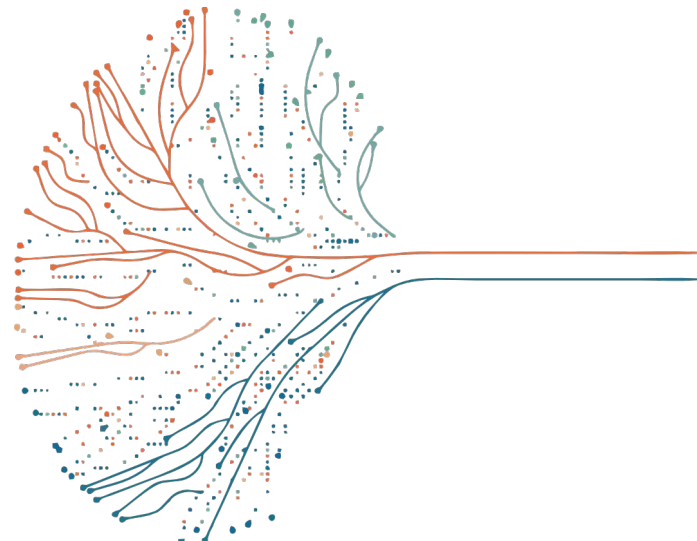

simplifies every interaction. The LogBook360 Mobile App brings hosts and visitors together in one intelligent platform. Role based access ensures every user sees exactly what they need while AL3i, the built in agentic assistant, guides the entire visit journey end to end.

KEY CAPABILITIES

- One app for hosts and visitors with automatic privilege control
- AL3i voice and chat assistance for scheduling, check-in, navigation, and updates
- Real time traffic and weather insights with recommendations to reschedule or notify counterparts
- Smart alerts for arrival status, delays, parking, and building entry instructions
- Digital QR badge, touchless check-in, and multilingual support
- Meeting preparation assistance including agenda reminders and required documentation
- Suggestions for transportation modes and best routes to the meeting location
- Host tools for quick approvals, visitor tracking, and emergency notifications

AL3i ensures that every step is proactive, predictable, and seamless. Whether users are planning a visit, traveling to campus or office, or engaging in a meeting, the LogBook360 app keeps them informed, prepared, and connected at all times.

LogBook360 by GlobalVox combines cutting-edge technology, compliance rigor, and user-centric design to deliver a secure, scalable, and intuitive visitor management experience. Whether you're standardizing processes across locations or elevating front-desk operations with touch-less flows, LogBook360 helps you deliver results—safely, efficiently, and confidently.
